

## Science Worksheets

### Week of March 16-20:

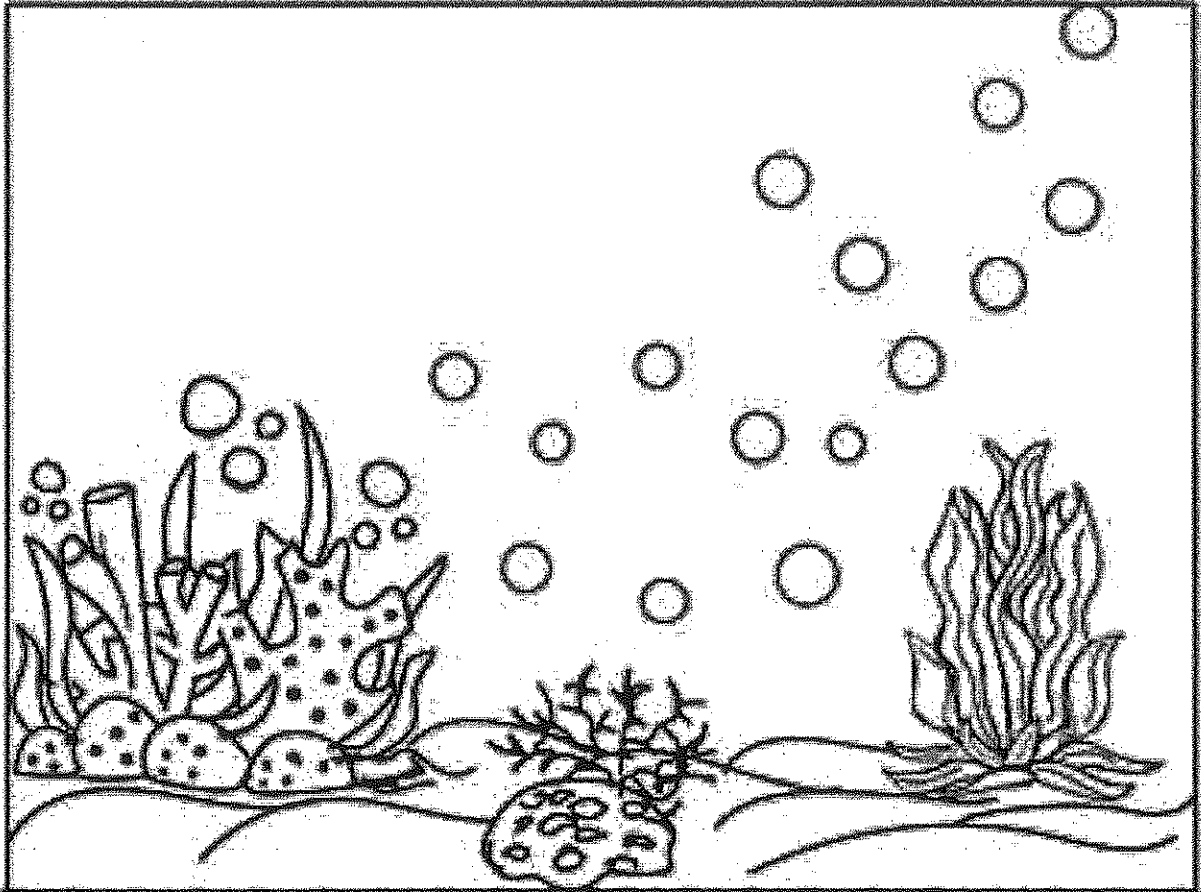

For the sink and float worksheet please conduct an experiment.

First step, is to fill a bucket (or the sink with water). Look around the house and find 5 objects to test to see if they float or sink. First circle your hypothesis and test each item two times. Record your answers on the work sheet.

### Week of March 23-27:

This month your scholar has been learning about ocean life. Please have your scholar write a sentence about what they have learned about ocean life. Please be sure your child has correct punctuation, spacing, and capitalization. Grading will consist of these aspects.

**SINK OR FLOAT?**

Guess whether each object will sink or float when you put it in water. Circle your guess. Put the object in the water. Circle **float** or **sink** to show what happens. Put the object in the water again. Circle **float** or **sink** to show what happens the second time.

OBJECT	GUESS	1 <sup>st</sup> TRY	2 <sup>nd</sup> TRY
	float sink	float sink	float sink
	float sink	float sink	float sink
	float sink	float sink	float sink
	float sink	float sink	float sink
	float sink	float sink	float sink
