MATH 126 Precalculus	381043 PreCalculus DE	1.0 Mathematics credit
MATH 155 Intro to Probability & Statistics	373113 Probability and Statistics DE	1.0 Mathematics credit

**Important Notes**

- Students will **ONLY** earn high school credit for the classes listed above. Though there are similar Bowie State courses, it is important that students **ONLY** register for the courses listed in the left column if their goal is to increase their high school GPA.
- After applying for Bowie State University courses, students must meet with Mr. Jerry Isaac on the Bowie State campus. At this meeting, students will officially register for courses and Mr. Isaac will determine which courses students are actually eligible for based on their Accuplacer Scores and Transcripts, which are provided to Mr. Isaac by Ms. Gaudette ahead of time and on-site when students arrive (since students are expected to bring their transcript and Application materials with them)
- Courses taken in the Fall of your Senior year will *not* affect your high school GPA. Courses taken in the Spring of your senior year will *not* be added onto your high school transcript at all, but they will be on your college transcripts and will transfer to colleges like most other courses.
- Information about applications will be sent out to students and families in November
