CSP Stem Fair Judge Request

Dear Fellow Pioneer of Science,

I would like to cordially invite you to the Science Fair at our School in Hanover MD. With all the support from the scientific community this memorable event will be a huge success.

Chesapeake Science Point Public Charter School (CSP) is a unique school that is proud of its large and diverse student body which are selected from a lottery based system. In partnership with students, parents, and the community, CSP provides a rigorous and quality education for middle and high school students with a special focus on science, math, and technology. By incorporating math and technology in the classroom and encouraging students to participate in an informational society, CSP students have the skills and experience to advance and excel in higher education and the workforce.

As you know, there are many science-influenced basic skills expected by employers. Our students will have to make tough decisions that no other generation has encountered and will be influenced by their understanding of emerging science and technology. Science Fairs involve the integration of Science with Technology and Engineering, which will require them to apply these skills to a topic of interest to them. A Science Fair is an essential key to understanding the scientific method and completing, therefore, have a better understanding of Science.

On **Saturday, December 14, 2019 (Snow date 12/17/17 After School hours)** our hard working students will present their projects. This memorable event is expected to have around 200 projects. We are in great need of dedicated members who would like to share their enthusiasm for science by volunteering to be a judge in our Science Fair. Prior judging experience is not required; a brief judging session will be given prior to the actual judging. In appreciation of your time, breakfast, lunch, and a certificate for your sacrifice of time will be given. We anticipate the need for a minimum of 50 judges. If you know anyone else who would also be interested in helping with judging, please relay this information.

This will be a great opportunity for you to see what our school is about and to meet all the exemplary students. If you are interested in helping young students develop as future scientists and reach their full potential, please contact me immediately AND use the link below to formally sign up. We look forward to making your acquaintance. A schedule of the day is provided for your convenience.

[CLICK HERE TO SIGN UP AS A JUDGE](#)

Best regards,

Ashish Vadalia
